Web Developer

I'm a web developer with experience in both front-end and back-end technologies, including React, Node.js, and MongoDB. As I transition my career, I'm excited to dive into areas like cloud infrastructure and AI. I thrive in team environments and am always eager to learn and embrace new challenges.

Skills

Front-end: React.js, JavaScript, HTML, CSS

Back-end: Node.js, Express, MongoDB, C++, C#

Currently learning: Python

Tools and Methods: Git, GitHub, Insomnia, Postman, Trello, VS Code

Web Development Projects

Stock Website - Web app designed to look-up and save favorite stocks

Repo: <https://github.com/Anthony-Lorenzon/StockWebsite>

- Enabled secure user login and session management using Auth0, providing seamless authentication and authorization.
- Developed a feature for real-time stock data retrieval through API calls, allowing users to search and view stock information.
- Designed and integrated a MongoDB database to store and manage users' favorite stocks, allowing them to add, remove, and maintain a personalized list across sessions.

Technologies: Javascript, React, MongoDB, OAuth

E-commerce website - Mock e-commerce website

Repo: (Private) <https://github.com/Dani-Despatie/project-GROUP-e-commerce>

- Collaborated in a team to create a full-stack e-commerce application with MERN stack.
- Handled stock verification, reducing inventory upon purchase, and ensuring data consistency.
- Created endpoints for the frontend to retrieve product information and handle purchases effectively.

Technologies: HTML, Javascript, RESTful endpoints

EDUCATION

Concordia University

Sep 2024

Diploma in Full-Stack Web Development
